

as you know – just throwing the piano down – they realized a systematic attack – and derelict neglected unfunctional for years – we say – so unpleasant – events – planned to be organized – participated to events not only here - groups of twenty or thirty people - a situation like cramping the place – they threw it and went into the other rooms as quickly as they came the man in shock was still trembling in the corner they threw him in - to make his place tight - it lasted until eight in the evening actually - I can't tell you - from disturbing him - his hands get dirty he washes them and comes home for example - the story of what we call the dirt on his hands - events from this point on it starts - it may include cases - it is aimed to be done - I don't want to say the number wrong they are all arrested - collected - but in general - I want to say this - what is it - the cursed share - it never falls - then - after that cursed share - there is no - actually it spreads towards - in groups - provides services and gives speeches - it is also detected that it is marked - well it is a cult that became a place where people say *illallah* and then it was restored and its features were completely changed and this time it was rented as a cafe center rather than a shopping center - it is attacking - events are happening simultaneously takes place - it was a narrower square - they were able to contain it, but the unrest flared up on a regional level in the following days and weeks - now we will look at some of the details of these events - I cannot say - he explains that he is confused by the events - why did they happen - there is damage there is material damage - but that's about it I guess we all know that we need to be informed - places are also predetermined with various signs such as - a place where important parts of a part of our culture pass - and these roads were not opened so this is going downwards - it says - I want to say this what is it at the end - I am very sorry for such an unpleasant situation since I am talking about the incident - look there is a car repair thing below they have galleries - it was timely - this is the starting point anyway - I will also read through some personal testimonies because there is something like this this is not a researched subject - the houses they lived in – consults can we do something like this so and so on - they have a situation related to the problem - is it's always interesting to me that car repair and casino come together - for example there are hardware stores downstairs they break down those hardware stores and buy their tools that is they actually gather people just because we are going for a walk and then things happen by provoking - six thousand properties are damaged - today - why did these happen - they do not damage anything - and misinformation has very dire consequences because it is a good thing to see and understand that is it is a very permanent thing - it says that the hand has been extended - this - I want to say this - so what is it - some conflicts occur - here - they tie the rolls of fabric to the back of the cars like this and unwind them - or rather since the photo came out I mean it goes without saying how important the tools are and how expensive they are - we need to look at the concept of the square - it's not our time to stop - now I mean what else was there actually here in those days first of all we have to say the most important thing - I thought you could say it - he lived and took stricter security measures - what do we think now - everywhere was looted - he said he would pay for the damage - do you know there is something what he called the cursed share - I mean they are very attractive places - I mean these things are like that okay - let's talk okay - and we don't see any harm in saying it publicly - advantage - all the decorations the original stonework all the original thing the origin - an order came from the - it was being burned - It caused a conflict because - he gave a speech there - we could see but we couldn't do anything - he told us not to intervene until further notice we locked the doors and waited inside - they tie the fabrics to the back of the cars - he makes two prints - and then it becomes unusable - hah what else we remember - it's a rich place - as we say overproduced goods not apples and pears but furs etc - after that cursed share - if there is an economic problem a social problem is served - I mean I'm telling this story briefly but the events are deeper - we do not know this very well that it is in this square – where he expresses his views sir this is an area where he shows resistance and expresses his opinions – I mean the square is a thing what do they say it is the thing of a country what can I tell you it is a demonstration area – it is weakened and is receiving foreign aid – it is a demonstration area of power and counterpower – but it was too late – places like this are now called nowhere they can now make us feel all these features only through the signs they hang although we could have felt it differently right – no okay – it has grown so much – after the water distribution system was introduced then this place starts to become a little more urbanized - the square is such a place it is actually a place where there is entertainment - they were able to control it but the unrest flared up at a regional level in the following days and weeks - I'm very sorry I can't read a little bit of something - now - so pay attention because it is homogeneous It's attractive that's why I'm giving you this information - either a *Maksim* is built a water distributing system is brought in - this hill is planned as a large cultural center - the way hospitals work is such that if there is a hospital it also has a garden somewhere it will make its food from that garden and so on you know it does not spread to the public during the pandemic period there is no entry or exit from the hospital that is it is closed to the system to protect from the disease they have a situation about it - let me tell you the right to use it - the most important thing is the language issue - what did these places serve what kind of thoughts did people have in this street - well now there is not only taking and throwing but also stealing - it is prohibited - imagine you know deserted places actually - they chose to escape from here I mean to avoid being under this domination - I tell the men to stop I'm not ready I'm making adjustments - places them on the ground- let's talk, shall we - let me tell you the right to use it after we have seized it - especially the youth reacted very aggressively on the other hand the press provoked it - what caused these - I have more goods than I have there must be a market to sell my goods right - when the economy is good everything is good but when the economy stumbles a little which - the economy stumbles – they start to live together – it opened and the four people came in and they threw the man aside and the water in their hands – it is at a very important point because it is at an important point of trade – when we look at our genealogy we cannot go back before that because before that the census was not done in the form of a census for example it is considered a household - I mean I don't know if it seems very original and nice to you the decorations are beautiful and the fact that we can keep them as original is a great advantage as a country - I want to say this - it has also been attacked - they can prune our branches but no one can harm the roots of our old tree - I guess things were different back then human working principles it is very difficult to establish a system where you see money as a commodity - while we are here the population increases and as the population increases, the needs increase of course, as the needs increase space is shown here and as space is shown here houses start to be built here photos when the first houses are built for example there are graves in front of the houses so imagine there are graves right in front of the door - there is this decoration style sir there are lions for example do you know these lions that look very ugly - do you have any idea how many hours these events lasted - they make you unable to work - because there are no sidewalks houses are being built but there is no sidewalk to go to school pavements and so on are planned then this place gets a zoning plan as a result - they have a problem with it - there is a grand piano - the showcase is broken - it would be okay if it happened - evil stays out, good comes in it represents him - especially the youth reacted very aggressively on the other hand the press provoked it - they destroyed the place with sticks threw some of his belongings the man's luggage and some of the room's belongings out the window - in this case, places change hands property is also a lie take and use for some time - don't go that lati - how I said so many places everywhere is gone but they enter some places that is the sign - eight or nine then they intervene like that - he knows there is something called the cursed share - there was a passenger wearing his pajamas and climbing to the window it was broken open - can I explain it to you what can I tell you this is the table of the wolves this is really a true thing the table of the wolves is an understanding - look when you look at the air you can see that all these decorations are original please see that the doors on the right and left have been restored as originals - now what do people think we can be satisfied with enough products without harming anything what is a bread cheese olives then blah blah blah I mean people have too much does he need anything but when a person produces something more than himself that share is the share that he will sell the share that is left over from himself that is the cursed share - okay in order for a man to stand up again he must have as much wealth as the goods inside so that he can stand up again this place is damaged to such an extent - it's dirty and he says we need to demolish it in order to clean the dump now we call it with our current mind gentrification means stripping it from its previous identity and giving it a new identity - you know it is not very easy to go from one place to another you go on journeys that last forty days you stay for five days or so in the places you go to a journey but then something like this is born, tourism already exists it started before but you know it doesn't exist in this land we should build a hotel we should come here too - he says - there is a huge garden area then there are meetings here entertainment now cooperation clubs agreements contracts acquaintances mergers separations - reunited - fabrics of course - look everywhere is like this - now I want to say something like this I apologize again if I'm wrong - we plunder everything in the marked places - something like this happens people come with empty bags sacks - then okay I'm ready I say throw it if you want – so they are terminating your employment now– they fill sacks and take away the goods shoes bags all kinds of jewelry everything – this is the garden I mentioned okay this garden meant that it was the garden of proms in the past right I think it is very beautiful – look at the entrance of the Jinal door rose decorations on marble not on original stone – this is really it the story is true it is not a made-up story - well you know there is sun fortunately it is very beautiful you can stand in a single row and it is comfortable - he held some people responsible for the rest of his statements - his restriction - here of course like this here like that you know all the way to the upper floors it's not like you go out and throw things out of the windows I mean I entered the ground floor it's not - they push luckily I shoot the piano while it is in the air - let's read it now with your permission - groups of twenty or thirty people - take a look at the magnificent entrance on the left I mean there is a really magnificent entrance there is a magnificent staircase there. there is - this is it at this point - there is a race, actually there is a cultural race - now this is the place, as I said now, it is abandoned - this thing is very modest there are only shops there are no houses in it - after that we see that the back part is now a horse farm what is it today of course what else will happen to the shopping mall - something happens it becomes a mess then you demolish it and build a new one and - to reveal the inner face - if there is a war somewhere it means there is transformation there is such a situation - now I would like to say something like this sorry again if I'm wrong wishing - but the front leg of the piano gets stuck on something - yes this is a bit of a narrow point I'm sorry but - they throw away all the goods - what can I tell you all kinds of events have become very complicated here after a certain time - his hands get dirty he washes them and comes home for example the story - now the story is like this...
